Diabetes Medical Management Plan (DMMP)

This plan should be completed by the student's personal diabetes health care team, including the parents/guardians. It should be reviewed with relevant school staff and copies should be kept in a place that can be accessed easily by the school nurse, trained diabetes personnel, and other authorized personnel.

Date of plan: This plan is valid for the current school year:

Checking blood glucose						
Brand/model of blood glucose meter:						
Target range of blood glucose:						
Before meals: □ 90–130 mg/dL □ Other:						
Check blood glucose level:						
☐ Before breakfast ☐ After breakfast ☐ Hours after breakfast ☐ 2 hours after a correction dose						
☐ Before lunch ☐ ☐ ☐ Hours after lunch ☐ Before dismissal						
☐ Mid-morning ☐ Before PE ☐ After PE ☐ Other:						
☐ As needed for signs/symptoms of low or high blood glucose ☐ As needed for signs/symptoms of illness						
Preferred site of testing: ☐ Side of fingertip ☐ Other:	_					
Note: The side of the fingertip should always be used to check blood glucose level if	hypoglycemia is s	suspected.				
Student's self-care blood glucose checking skills:	,, ,,	•				
☐ Independently checks own blood glucose						
☐ May check blood glucose with supervision						
☐ Requires a school nurse or trained diabetes personnel to check blood glucose						
☐ Uses a smartphone or other monitoring technology to track blood glucose value	S					
Continuous glucose monitor (CGM):						
Alarms set for: Severe Low: Low: High:						
Predictive alarm: Low: High: Rate of change: Lo						
Threshold suspend setting:						
Additional information for student with CGM						
 Confirm CGM results with a blood glucose meter check before taking action or If the student has signs or symptoms of hypoglycemia, check fingertip blood gl Insulin injections should be given at least three inches away from the CGM inst Do not disconnect from the CGM for sports activities. If the adhesive is peeling, reinforce it with approved medical tape. If the CGM becomes dislodged, return everything to the parents/guardians. Do Refer to the manufacturer's instructions on how to use the student's device. 	ucose level regard ertion site.	lless of the CGM.				
Student's Self-care CGM Skills	Indep	pendent?				
The student troubleshoots alarms and malfunctions.	☐ Yes	□No				
The student knows what to do and is able to deal with a HIGH alarm.	☐ Yes	□ No				
The student knows what to do and is able to deal with a LOW alarm.	☐ Yes	□ No				
The student can calibrate the CGM.						
The student knows what to do when the CGM indicates a rapid trending rise or fall in the blood glucose level.						
The student should be escorted to the nurse if the CGM alarm goes off:	No					

Hypoglycemia treatment						
Student's usual symptoms of hypoglycemia (list below):						
If exhibiting symptoms of hypoglyc product equal to grams of		ess thanmg/dL, give	a quick-acting glucose			
Recheck blood glucose in 15 minut Additional treatment:			mg/dL.			
If the student is unable to eat or d movement): • Position the student on his or		ve, or is having seizure activ	vity or convulsions (jerking			
Give glucagon:	☐ 1 mg ☐ ½ mg	☐ Other (dose)				
• Route:	☐ Subcutaneous (SC)	☐ Intramuscular (IM)				
 Site for glucagon injecti 	on: ☐ Buttocks ☐ Arm	☐ Thigh ☐ C	ther:			
• Call 911 (Emergency Medical S	Services) and the student's parents,	/guardians.				
• Contact the student's health c	are provider.					
 For blood glucose greater than insulin (see correction dose or Notify parents/guardians if blo For insulin pump users: see Ac Allow unrestricted access to the 	or ketones every hours whenmg/dL AND at least ders). ood glucose is over mg/ditional Information for Student whe bathroom. ugar-containing drinks (not fruit ju	n blood glucose levels are ab hours since last insulin dos dL. vith Insulin Pump.	povemg/dL. se, give correction dose of			
• Follow physical activity and sp If the student has symptoms of a h student's parents/guardians and h extreme thirst, nausea and vomitir sleepiness or lethargy, or depresse	ealth care provider. Symptoms of a g, severe abdominal pain, heavy bu	Emergency Medical Service hyperglycemia emergency	include: dry mouth,			
Insulin therapy						
Insulin delivery device:	☐ Syringe	☐ Insulin pen	☐ Insulin pump			
Type of insulin therapy at school:	☐ Adjustable (basal-bolus) insulin	☐ Fixed insulin therapy	☐ No insulin			

Insulin therapy (continued)
Adjustable (Basal-bolus) Insulin Therapy
Carbohydrate Coverage/Correction Dose: Name of insulin:
Carbohydrate Coverage:
Insulin-to-carbohydrate ratio: Lunch: 1 unit of insulin per grams of carbohydrate
Breakfast: 1 unit of insulin per grams of carbohydrate Snack: 1 unit of insulin per grams of carbohydrate
Carbohydrate Dose Calculation Example
Total Grams of Carbohydrate to Be Eaten = Units of Insulin
Insulin-to-Carbohydrate Ratio
Correction Dose: Blood glucose correction factor (insulin sensitivity factor) = Target blood glucose =mg/dl
Correction Dose Calculation Example
Current Blood Glucose — Target Blood Glucose = Units of Insulin
Correction Factor
Correction dose scale (use instead of calculation above to determine insulin correction dose):
Blood glucose to mg/dL, give units Blood glucose to mg/dL, give units
Blood glucose to mg/dL, give units Blood glucose to mg/dL, give units
See the worksheet examples in Advanced Insulin Management: Using Insulin-to-Carb Ratios and Correction Factors for instructions on how to compute the insulin dose using a student's insulin-to-carb ratio and insulin correction factor.
When to give insulin:
Breakfast
☐ Carbohydrate coverage only
☐ Carbohydrate coverage plus correction dose when blood glucose is greater than mg/dL and hours since last insulin dose.
☐ Other:
Lunch
☐ Carbohydrate coverage only
☐ Carbohydrate coverage plus correction dose when blood glucose is greater than mg/dL and hours since last insulin dose.
□ Other:
Snack
☐ No coverage for snack
☐ Carbohydrate coverage only
☐ Carbohydrate coverage plus correction dose when blood glucose is greater than mg/dL and hours since last insulin dose.
☐ Correction dose only: For blood glucose greater than mg/dL AND at least hours since last insulin dose.
☐ Other:
